EXPERIENCE

2022-04-11 – Present (3.5+ years)

Software Engineer

ITalent Digital, Hyderabad

- Built an **AI** based Microsoft **Teams** and Custom Next JS and Node JS based application for managing different employee related request submissions such as, Employee leave management, Employee Travel System (Carbon Neutral Analysis), Reimbursement request etc. Using **AI (Google Vertex AI)** for ease of request submissions in the form of chatting, and Notification System to the Manager and Requestor.
- Built a **Document Editor** using React JS and **PSPDFKit** for Microsoft D365 CRM for a bank, which supports different documents viewing and editing example, **EML & MSG** (Email Formats), PDF, Doc, Docx, Tif, **Tiff (old format Tif)**, JPEG, PNG, PPT, PPTX, CSV, etc. Which handles huge files too with ease.
- Built an **AI (Open AI GPT 3)** based react application for a CRM application to summarize the articles comments and give users a best answer after analyzing all the comments in the article to improve user experience, and some other useful **AI based tools** for the CRM.
- Worked on Microsoft Power Platform Community migration from Khoros platform to Microsoft owned Dynamic D365 platform, for customizations used JavaScript, and for automation (mails, likes, comments, etc.) Power Automate, Power Apps.
- Worked on Khoros CRM application customizations and custom developments using JavaScript, where I have worked on customizing Cisco Khoros CRM, advanced filtration of the community articles with advanced conditional filtration options visibility and filtering data based on the filters, and other UI customizations for ease of access.
- Worked on **Google and DeepL language translation** tools for translating entire website content for different projects using JavaScript, with **minimum API calls** and **better performance**.

2021-07-21 – 2022-03-31

Jr. Software Developer

Amoghnya Tech Solutions, Hyderabad

- Worked on Backend of an ERP application for Pet Store where each branch can Purchase and Sale products, check stock details, also manage ledger accounts.
- This Application helped Pet Store to manage them all their branches stock details, sales and purchases ledger accounts and maintain a complete record of users and there are transactions Also, we have integrated **Coupon and Membership card system** in the application.
- Worked on Frontend for an Online Course Selling and Users Management application where admin will be able to add video courses and manage their users. Here we have integrated **Razorpay for payments** which also had KYC verification if the customers want to become part of selling courses it is like chain system.

Back End Skills

Node JS, Nest JS, Express JS, MongoDB, Mongoose, SQL, Apollo GraphQL Server, C#, Microsoft Teams Bot Framework, Astro

Cloud Skills

Azure ADO, Azure Functions, Azure Blob Storage, Azure Apps, Azure Open AI, Azure Web Apps, Google Vertex AI, etc.

Web Services

REST API, GraphQL

Tools

Webpack, Vite JS, Postman, Git, GitHub, Bitbucket, GitLab, Jest, Markdown, VS Code IDE, NPM, Yarn, Sinon

Low Code Skills

Dynamics 365 CRM, Power Apps, Power Platform, Power Pages, Power Automate, XRM Toolbox

PERSONAL PROJECTS

Covid Help Disk using MERN Stack

May 2021 – May 2021 (1 Week)

- In the covid 19 pandemic more people are dying just because they are unable to find a hospital where there are oxygen, beds and medicine available in the other end in some hospitals they are going waste just because of mis management or not using them efficiently.
- With the help of Covid Help Disk people can find hospitals where oxygen, beds and medicine are available and can go to that hospital directly without wasting time in searching by visiting all nearby hospitals.
